

Specialist Leader Of Education Profile

Daniel Lewington

Background Experience

I have 6 years of teaching experience specialising in mathematics with most of my teaching responsibility within KS2.

My training in mathematics has come from completing the PGCert in Specialist Primary Mathematics Practice. I am also currently studying for the MA in Specialist Primary Mathematics Practice.

Presently, I work as the Lead Practitioner for Primary Maths at Windsor Academy Trust (WAT) and am involved in developing teaching, learning and assessment across the primary schools in the trust. This involves working closely with the maths co-ordinators as well as supporting class teachers.

I am currently developing the maths curriculum across WAT by using research to inform practice and policy and thus enrich the curriculum through a cross-curricular approach that inspires staff and children alike.

In my role, I have also been involved in school improvement through assessment and monitoring, as well as supporting through CPD and coaching to ensure teaching staff develop a deep pedagogical understanding of mathematics.

I am passionate that staff and children not only have a good understanding of maths but develop a life-long love for it too.

Areas of Expertise

PRIMARY MATHS:

- Teaching and learning across the primary phases.
- Supporting staff in improving teaching and learning, assessing, moderating and planning.
- Providing CPD on subject knowledge as well as problem solving.
- Focusing on using and applying maths across the wider curriculum, especially STEM subjects.
