

## Specialist Leader Of Education Profile

Sam Davis

### **Background Experience**

I have 9 years of teaching experience specialising in mathematics and with most my teaching responsibility in year 6.

My background in mathematics stems from beyond the teaching with a Mathematics BSc with honours degree. I then began to focus in on mathematics in teaching: Key Stage 2/3 Maths PGCE, completing both the MaST and advanced MaST PGCE leading to the award of a Master of Arts Specialist Primary Mathematics Practice. I continually work with networks of maths teachers across the region to improve and reflect on practices, developing new ways to improve teaching, learning and assessment.

I am continually looking to improve my practice attending up to date training and course which most recently include: Middle Leaders, Outstanding teacher and coaching training.

As part of the SLT I play a role in the monitoring cycle looking at continual school improvement. I have also taken the lead role in implementing, sustaining and continually developing a whole school approach to mathematics to best meet the needs of the pupils. Through this I have delivered CPD, conducting my own monitoring and worked alongside staff to develop their understanding and pedagogy of mathematics. I also enjoy the challenge of looking at assessment and developing ways to use and analysis the data effectively.

## Areas of Expertise

PRIMARY MATHS: Teaching and learning across the EYFS and Primary Phases.

Supporting staff in school in the mathematics curriculum: Sharing good practice, supporting teachers in teaching, learning and planning, moderating, assessment and maths CPD sessions.

Teaching and learning within the Upper Key Stage 2 Phase: Supporting staff to develop their practice in the classroom, planning and assessing.

## Home School

Lower Farm Primary, Walsall
